

PLUG AND PLAY
WORKSPACE ANALYTICS

Do you want to try the solution of thingdust and learn more about the possibilities?

For this we created the thingdust demokit. It contains all what you need to set up a test installation of our solution. All in one and easy to install. If our solution convinces you, we kindly prepare you a personal offer for your office.

1. Easy installation of the gateway. Just plug in the powerplug. The gateway connects to the 4G mobile network. No IT integration needed.
2. Just put the battery in the sensor and fix it with stickers, magnets or screws. We prepare the platform for you that you can start immediately.
3. With your link you have the possibilities to see the analytics and all the measured spaces.
4. After 20 days we contact you for the further. At the latest after 30 days you can get a personal offer for your office.

CONTENT
